EXPERIENCE

Impact Digital Lab

May 2024 — August 2024

FRONTEND DEVELOPER

- Fully implemented WebSocket on the frontend, creating and configuring events for real-time data processing, which increased the interactivity and responsiveness of the application by 25%.
- Led the development of key frontend functions using React.js and TypeScript, providing a 20% increase in user satisfaction.
- Optimized application performance by implementing Vite, which accelerated assembly and reduced bundle sizes by 30%.
- Managed state and design using Redux Toolkit and styled-components, increasing the consistency and scalability of projects by 15%.
- Led the architecture and design of the application, utilizing Feature-Sliced Design and integrating Lazy Loading to improve code efficiency and performance.

LeadMaker Media

Feb 2024 — May 2024

FRONTEND DEVELOPER

- Developed user interfaces for various company projects using React, enhancing user interaction by 30%.
- Optimized frontend architecture by implementing code splitting and lazy loading, reducing page load times by 40% and increasing response speed by 20%.
- Implemented new features and integrated them with backend services using Axios and Redux, improving application functionality and efficiency.
- Responsible for architectural decisions, code decomposition, and optimization, ensuring scalable and maintainable frontend solutions.

Outtalent

Jan 2023 — Dec 2023

FULL STACK DEVELOPER

- Developed and maintained multifunctional web applications using Node.js and Express for backend and Vue 3 for frontend.
- Migrated Outtalent's website from React to Vue, utilizing Vue Router and Vuex to enhance performance and user experience, increasing usability by 30%.
- Successfully moved project-wide state management from Context to Redux Toolkit for easier management of complex states
- Optimized the code of the project, which allowed to facilitate the development and speed up the work of the site by 5%.

Inclusive Technology

September 2022 — Jan 2023

FRONTEND DEVELOPER

- Developed user interfaces for web applications using React, improving user interaction by 20%.
- Implemented Firebase from scratch, utilizing Remote Config to manage application configuration parameters, enhancing flexibility and functionality customization by 25%.
- Implemented adaptive design and styling for mobile and desktop platforms using CSS Grid and Flexbox, improving user experience and usability by 25%.

TECHNICAL SKILLS

Programming languages : JavaScript, Typescript, Python, Java

Frontend :HTML5, CSS3 (CSS modules, styled components, Tailwind, MUI), JavaScript/TypeScript (ES6+), React (routes, hooks), Redux (thunk, toolkit, RTK Query), Next.js,Vue,Zustand,Webpack,Docker, eslint, i18n, AJAX (axios), Web socket (socket.io), REST API

Backend:Node.js,Express.js,REST,Colyseus,WebSocket,MongoDb,PostgreSQL,Sequelize

Languages :English B2, German B1, Kyrgyz(Native), Russian (Native)

EDUCATION

Kyrgyz-German Institute for Applied Informatics (GPA: 4.40 / 4.85)

Kyrgyzstan,Bishkek

WEB DEVELOPMENT

Sep. 2021 – May 2025

- Related coursework: Algorithms and Data Structures (Java),Prob & Stat in CS (Python), Introduction to CS II (C++), Linear Algebra with Computational Applications (Python)
